

energy drilling

Your Partner in Drilling

19th of March, 2019

To whom it may concern,

My employer, Energy Drilling Management Pte Ltd has been operating an offshore mobile drilling rig, Edrill 2, in Myanmar waters since December 2015 until March 2019.

For the whole of this period we have had an Agency Service Agreement with SMART Technical Services In Yangon Myanmar.

SMART have assisted us in so many ways other than just being our agent and a labor supplier.

They have been our partner and our friend during this period.

The SMART team has always been there when needed. Some of the challenges that have arisen during our project was "unknown territory". No other mobile drilling rig has come close to operating as long as the Edrill 2 has been in country.

SMART have made Energy Drilling ability to perform in Myanmar a lot easier, always having a solution to any problem that has been encountered.

Therefore I do not hesitate to recommend the SMART team to any company who plan to operate in Myanmar.

The service you will get from their experienced personnel will greatly aid your operation.

The chairman of SMART, Mr. Kyaw Kyaw Hlaing, the Director, Yadana Su Hlaing and Director (Business Development) Zarni Swe are always in touch ensuring that their team is on track and that I am operating without problems or issues.

Yours Sincerely,

Graeme Bain

Rig Manager ED2.
